SUMMARY

Final-year Computer Engineering student at Bahauddin Zakariya University (CGPA: 3.39/4.0, May 2026) with 2.5+ years of experience in AI evaluation, research analysis, and software development. Skilled in building AI-powered Android applications using Kotlin, Jetpack Compose, Firebase, and TensorFlow Lite. Experienced in developing ML-driven recruitment systems with Gemini API, semantic matching, and NLP pipelines. Seeking a Software Engineer role at a reputable Pakistani software house to build impactful AI-integrated products.

SKILLS

Programming Languages Kotlin, Python, JavaScript, TypeScript, C++, C#, HTML, CSS

Frontend & Web React, Vite, Tailwind CSS, Framer Motion

Data Analysis & AI TF-IDF, KeyBERT, Semantic Matching, Cosine Similarity, Voice/Sentiment Analysis, SPSS (Quantitative), NVivo (Qualitative)

IoT & Hardware ESP32

Academic Writing & Tools APA, MLA, IEEE, Chicago, Harvard, Git, GitHub, Android Studio, VS Code, MS Office Suite

EDUCATION

Bachelor in Computer Engineering, Bahauddin Zakariya University (GPA: 3.39 / 4.0)

Jan '22 — May '26
Multan, Pakistan

- Expected Graduation: May 2026

PROJECTS

Zenvyra Health - IoT-Integrated AI Health Monitoring Android App (Final Year Project), Zenvyra Health

2024 — 2025

- Tech Stack: Kotlin
- Jetpack Compose
- Firebase
- TensorFlow Lite
- ESP32
- Biomedical Sensors . Built a full-stack AI health monitoring system combining an ESP32 wearable device with six biomedical sensors (heart rate, SpO2, temperature, GSR, ECG, motion) and a Kotlin/Jetpack Compose Android app.
- Integrated TensorFlow Lite on-device ML model for real-time stress classification based on multi-sensor biometric data streams.
- Developed Firebase backend (Auth, Firestore, Cloud Storage) for secure user data management, health history tracking, and PDF report generation.
- Designed and implemented four wellness mini-games (Calm Bubbles, Focus Trace, Flip Cards, Mandala Art), guided breathing exercises, streak tracking, and an AI coaching chatbot within the app. . Defended the project successfully; contributed hardware design, Android app architecture, ML integration, and full thesis documentation.

HireFlow - AI-Powered Recruitment Platform (In Progress), HireFlow

2025 — Present

- Tech Stack: Python
- Gemini API
- TF-IDF
- KeyBERT
- Semantic Matching
- Voice/Sentiment Analysis
- React/TypeScript
- Designing and building an end-to-end AI recruitment platform that automates candidate screening, resume analysis, and interview assessment.
- Implemented multi-layer ML pipeline: TF-IDF keyword extraction, KeyBERT skill matching, cosine similarity-based semantic resume-to-JD matching, and candidate ranking engine.
- Integrating Gemini API for intelligent job description parsing, AI-generated interview questions, and automated candidate feedback reports.
- Building voice analysis and sentiment analysis modules to evaluate candidate communication quality and confidence from recorded interview responses.
- Developing a React/TypeScript frontend dashboard for recruiter workflows including job posting management, ranked candidate lists, and analytics.

Personal Portfolio Website

2025 — 2025

- Tech Stack: React

- TypeScript
- Vite . Tailwind CSS . Framer Motion . Built a responsive developer portfolio showcasing Zenvyra Health and HireFlow with animated UI components and project detail sections.

EXPERIENCE

Research & Analytical Writing Specialist

Jan '23 — Present

FREELANCE

- Delivered 100+ structured research papers, literature reviews, analytical reports, and proposals across business, healthcare, technology, and social sciences domains.
- Conducted quantitative data analysis using SPSS and qualitative research analysis using NVivo for academic and industry clients.
- Applied academic citation standards including APA, MLA, IEEE, Chicago, Harvard, and Vancouver across multidisciplinary projects.
- Performed AI output evaluation and annotation tasks on platforms including Prolific and Scale AI, focusing on response quality, bias detection, and factual accuracy.
- Managed concurrent projects under strict deadlines while maintaining analytical accuracy and client satisfaction
- RESEARCH & AI EXPOSURE
- Researched AI applications in film industry transformation and urban crime hotspot prediction (systematic literature review).
- Conducted qualitative analysis on Organizational Culture & HR Analytics using NVivo.
- Performed quantitative mental health assessment and data analysis using SPSS.
- Studied international education performance metrics (TIMSS & PISA frameworks) and analyzed regulatory frameworks in the Saudi construction sector.
- Contributed to healthcare screening and environmental biogas research projects.
