

NOOR FATIMA

AI/ML Engineer | GenAI Developer | LLM & RAG Specialist
+92 305-4691948 | noorfatima23rd@gmail.com | Multan, Pakistan | LinkedIn

PROFESSIONAL SUMMARY

AI/ML Engineer and fresh Computer Engineering graduate (CGPA 3.39/4.0, BZU May 2026) with 2.5+ years of hands-on experience building LLM-powered applications, semantic search pipelines, and RAG systems. Proven ability to deliver end-to-end AI solutions — from backend ML pipelines to production-ready frontends. Seeking an Associate AI Engineer role to design and deploy intelligent automation systems at scale.

CORE COMPETENCIES

LLM APIs (Gemini, OpenAI) • Semantic Search & RAG Pipelines • FAISS Vector Indexing • Sentence Transformers • Prompt Engineering • NLP/NLU (TF-IDF, KeyBERT, Cosine Similarity) • Python • FastAPI • TensorFlow Lite • PyTorch (familiar) • Scikit-learn • Multi-Agent Workflow Design • PostgreSQL • MongoDB • React/TypeScript • Firebase • REST APIs • Git

TECHNICAL SKILLS

AI / GenAI: LLM APIs (Gemini, OpenAI), RAG Pipelines, FAISS, Sentence Transformers, Prompt Engineering

ML / NLP: TF-IDF, KeyBERT, Cosine Similarity, Semantic Matching, Voice & Sentiment Analysis, Scikit-learn

Languages: Python, Kotlin, JavaScript, TypeScript, C++, C#, HTML, CSS

Backend: FastAPI, PostgreSQL, MongoDB, SQLAlchemy, Motor (async), REST APIs

Frontend: React, TypeScript, Vite, Tailwind CSS, Framer Motion

ML Frameworks: TensorFlow Lite, Scikit-learn, Sentence Transformers, FAISS, PyTorch (familiar)

Mobile / IoT: Android Studio, Jetpack Compose, Firebase, ESP32, Biomedical Sensors

Tools: Git, GitHub, VS Code, Postman, SPSS, NVivo

PROJECTS

Study Agent — AI-Powered RAG Learning Assistant — 2025 – Present

Python • FastAPI • PostgreSQL • MongoDB • FAISS • Sentence Transformers • LLM APIs • RAG

- Built an end-to-end RAG pipeline enabling students to query uploaded PDFs using semantic search — directly aligned with the role's semantic search and LLM integration requirements.
- Implemented FAISS vector indexing with paraphrase-multilingual-MiniLM-L12-v2 (Sentence Transformers) for fast, meaning-aware retrieval in both Urdu and English.
- Designed dual-database architecture: PostgreSQL (SQLAlchemy) for structured data and MongoDB (Motor async) for document chunks and vector metadata.
- Built FastAPI backend with PDF upload, chunking with overlap, embedding generation, FAISS similarity search, and TF-IDF fallback retrieval.
- Demonstrates core competencies required: semantic search pipelines, LLM integration, and end-to-end AI application delivery.

HireFlow — AI-Powered Recruitment Platform — 2025 – Present

Python • Gemini API • TF-IDF • KeyBERT • Semantic Matching • Voice/Sentiment Analysis • React/TypeScript

- Designed and deployed a multi-agent AI recruitment system automating candidate screening, resume-to-JD matching, interview generation, and candidate ranking.
- Implemented multi-layer NLP pipeline: TF-IDF keyword extraction → KeyBERT skill matching → cosine similarity semantic matching → confidence-scored ranking engine.
- Integrated Gemini LLM API for intelligent JD parsing, AI-generated interview questions, and automated candidate feedback — showcasing practical LLM fine-tuning and prompt engineering.
- Built voice analysis and sentiment analysis modules to evaluate candidate communication quality from recorded responses.

- Developed React/TypeScript frontend with job management, ranked candidate lists, analytics dashboard, and PDF/CSV export.

Zenvyra Health — IoT-Integrated AI Health Monitoring App (FYP) — 2024 – 2025

Kotlin · Jetpack Compose · Firebase · TensorFlow Lite · ESP32 · Biomedical Sensors

- Delivered a complete AI health monitoring system: ESP32 wearable with six biomedical sensors + full Android application — from hardware to ML to UI.
- Integrated TensorFlow Lite on-device ML model for real-time multi-sensor stress classification, demonstrating ML deployment in production environments.
- Built Firebase backend (Auth, Firestore, Cloud Storage) for secure data handling, health history tracking, and automated PDF report generation.
- Successfully defended project with full thesis documentation; contributed hardware, Android architecture, ML integration, and system design.

WORK EXPERIENCE

Research & Analytical Writing Specialist — Freelance 2023 – Present

- Delivered 100+ structured research papers, literature reviews, and analytical reports across technology, healthcare, and business domains.
- Performed AI output evaluation and annotation on Prolific and Scale AI — assessing response quality, bias detection, and factual accuracy for LLM model improvement.
- Conducted quantitative analysis (SPSS) and qualitative analysis (NVivo) for academic and industry clients under strict deadlines.

EDUCATION

Bachelor of Computer Engineering — Bahauddin Zakariya University, Multan 2022 – May 2026

CGPA: 3.39 / 4.0 | Fresh Graduate, May 2026

LANGUAGES

English (Fluent) | Urdu (Native)
