

NOOR FATIMA

AI Engineer | GenAI Developer | Android Application Developer
+92 305-4691948 | noorfatima23rd@gmail.com | Multan, Pakistan | [LinkedIn](#)

PROFESSIONAL SUMMARY

Fresh graduate in Computer Engineering from Bahauddin Zakariya University (CGPA: 3.39/4.0, May 2026) with 2.5+ years of experience in AI-assisted development, research analysis, and software engineering. Specializes in building GenAI-powered applications using LLM APIs, RAG pipelines, and ML-driven systems. Creator of HireFlow — an end-to-end AI recruitment platform — and Zenvyra Health, an IoT health monitoring Android app. Seeking an Associate AI Engineer or Software Engineer role at a reputable Pakistani software house to build impactful AI-integrated products.

TECHNICAL SKILLS

Languages	Python, Kotlin, JavaScript, TypeScript, C++, C#, HTML, CSS
AI / GenAI	LLM APIs (Gemini, OpenAI), RAG Pipelines, FAISS, Sentence Transformers, Prompt Engineering
ML / NLP	TF-IDF, KeyBERT, Cosine Similarity, Semantic Matching, Voice & Sentiment Analysis, Scikit-learn
Mobile Dev	Android Studio, Jetpack Compose, Firebase (Auth, Firestore, Storage), TensorFlow Lite
Backend	FastAPI, PostgreSQL, MongoDB, SQLAlchemy, Motor (async), REST APIs
Frontend	React, TypeScript, Vite, Tailwind CSS, Framer Motion
IoT / Hardware	ESP32, Biomedical Sensors (MAX30102, DHT11, GSR, AD8232, MPU6050)
Tools	Git, GitHub, VS Code, Android Studio, Postman, MS Office Suite
Data Analysis	SPSS (Quantitative), NVivo (Qualitative)
Research	APA, MLA, IEEE, Chicago, Harvard, Vancouver — Academic Writing & Evidence Synthesis

EDUCATION

Bachelor of Computer Engineering — Bahauddin Zakariya University, Multan	2022 – May 2026
CGPA: 3.39 / 4.0 Graduated: May 2026 Fresh Graduate	

PROJECTS

HireFlow — AI-Powered Recruitment Platform2025 – Present

Tech Stack: Python · Gemini API · TF-IDF · KeyBERT · Semantic Matching · Voice/Sentiment Analysis · React/TypeScript

- Built an end-to-end AI recruitment platform automating candidate screening, resume analysis, and interview assessment for recruiters.
- Implemented multi-layer ML pipeline: TF-IDF keyword extraction, KeyBERT skill matching, cosine similarity-based semantic resume-to-JD matching, and candidate ranking engine with confidence scores.
- Integrated Gemini API for intelligent job description parsing, AI-generated interview questions, and automated candidate feedback reports.
- Built voice analysis and sentiment analysis modules to evaluate candidate communication quality and confidence from recorded interview responses.
- Developed a React/TypeScript frontend dashboard with job posting management, ranked candidate lists, pie chart analytics, PDF/CSV export, and authentication.

Study Agent — AI-Powered Learning Assistant2025 – Present

Tech Stack: Python · FastAPI · PostgreSQL · MongoDB · FAISS · Sentence Transformers · LLM APIs · RAG

- Building an intelligent study assistant that allows students to upload PDF documents and ask questions answered from their own notes using a RAG pipeline.
- Implemented semantic search using paraphrase-multilingual-MiniLM-L12-v2 (Sentence Transformers) with FAISS vector indexing for fast, meaning-aware retrieval — supporting both Urdu and English.

- Designed a dual-database architecture: PostgreSQL (SQLAlchemy) for structured user and session data, and MongoDB (Motor async) for document chunks and vector metadata.
- Built a FastAPI backend with PDF upload, text extraction, chunking with overlap, embedding generation, FAISS similarity search, and query endpoints.
- Integrated TF-IDF and keyword-based matching as a fallback retrieval method alongside semantic search.

Zenvyra Health — IoT-Integrated AI Health Monitoring Android App (FYP)

2024 – 2025

Tech Stack: Kotlin · Jetpack Compose · Firebase · TensorFlow Lite · ESP32 · Biomedical Sensors

- Built a full-stack AI health monitoring system combining an ESP32 wearable with six biomedical sensors (heart rate, SpO2, temperature, GSR, ECG, motion) and a complete Android app.
- Integrated TensorFlow Lite on-device ML model for real-time stress classification based on multi-sensor biometric data streams.
- Developed Firebase backend (Auth, Firestore, Cloud Storage) for secure user data, health history tracking, and PDF report generation.
- Designed four wellness mini-games, guided breathing exercises, streak tracking, and an AI coaching chatbot within the app.
- Successfully defended the project; contributed hardware design, Android app architecture, ML integration, and full thesis documentation.

Personal Portfolio Website

2025

Tech Stack: React · TypeScript · Vite · Tailwind CSS · Framer Motion

- Built a responsive developer portfolio with cosmic dark theme, animated UI components, and dedicated sections for Zenvyra Health and HireFlow.

WORK EXPERIENCE

Research & Analytical Writing Specialist — Freelance

2023 – Present

- Delivered 100+ structured research papers, literature reviews, analytical reports, and proposals across business, healthcare, technology, and social sciences.
- Conducted quantitative data analysis using SPSS and qualitative research analysis using NVivo for academic and industry clients.
- Performed AI output evaluation and annotation on Prolific and Scale AI — focusing on response quality, bias detection, and factual accuracy.
- Applied academic citation standards including APA, MLA, IEEE, Chicago, Harvard, and Vancouver across multidisciplinary projects.
- Managed concurrent projects under strict deadlines while maintaining analytical accuracy and client satisfaction.

RESEARCH & AI EXPOSURE

- Researched AI applications in film industry transformation and urban crime hotspot prediction (systematic literature review).
- Conducted qualitative analysis on Organizational Culture & HR Analytics using NVivo.
- Performed quantitative mental health assessment and data analysis using SPSS.
- Studied international education performance metrics (TIMSS & PISA frameworks) and analyzed regulatory frameworks in the Saudi construction sector.
- Contributed to healthcare screening and environmental biogas research projects.

LANGUAGES

English (Fluent) | Urdu (Native)
